1

Remove wheel axle nut (B).
CAUTION: Ensure that the nut is in good condition and the thread is undamaged. Otherwise, replacement with a new nut is recommended. Ensure that the fork leg where the nut normally works is clean of grease or other material residue, otherwise thorough cleaning of the area is recommended.
 Rimuovere il dado perno ruota (B).
 ATTENZIONE: assicurarsi che il dado sia in ottime condizioni e il filetto sia integro. Viceversa si consiglia la sostituzione con un dado nuovo. Assicurarsi che l'area, dove lavora il dado del perno ruota, sia pulita da grassi o residui di altri materiali, viceversa si consiglia un'accurata pulizia dell'area indicata.

Position the Acerbis disk cover (A) and secure it by means of the wheel axle nut (B). Grip the disk cover by levering it over the disc itself to prevent it from rotating when the nut is tightened.
 Posizionare il copridisco Acerbis (A) e fissarlo tramite il dado perno ruota (B). Afferrare il copridisco facendo leva sul disco stesso per evitare che, stringendo il dado, il disco possa ruotare.

WARNING!

Use Acerbis' products at your own risk. Check the safety of your device before you ride. Be sure that you follow the instructions for installing the Acerbis' products. Do not ride if there is missing or damaged hardware. If this is the case, take the item immediately back to your dealer. Make sure the throttle and other controls are free every time you ride. Not following these instructions and warnings could lead to interference with the controls, loss of control, and accidents. Acerbis recommends that installation must be done by a licensed mechanic and that only Acerbis' original parts are used during installation. Acerbis makes no guarantees or representations, express or implied, regarding the fitment of its product for any particular purpose.
