## FEATURES

The X-GRIP frame cover is conceived and designed to protect the frame in the area of contact with the rider's boots. The product has a dual function: to protect the frame from rubbing wear and to increase grip while riding. For this reason, a layer of rubber is applied to the outside of the frame cover to increase grip. Assembly and disassembly are facilitated by the use of expansions and elastic bands.

Protects the frame in the maximum friction area  
Use of rubber to increase grip and therefore control of the motorcycle  
Easy assembly and dismantling with expander and plastic bands
