X-GRIP FRAME
PROTECTION FOR
TRIUMPH
298670

298670-237

FEATURES

The X-GRIP frame cover is conceived and designed to protect the frame in the area of contact with the rider's boots. The product has a dual function: to protect the frame from rubbing wear and to increase grip while riding. For this reason, a layer of rubber is applied to the outside of the frame cover to increase grip. Assembly and disassembly are facilitated by the use of expansions and elastic bands.

Protects the frame in the area of maximum friction
Use of rubber to increase grip and thus control of the bike
Easy assembly and disassembly using the original screw and plastic ties

FEATURES

Closed handguard with a lightweight aluminum bar that is over-molded in plastic for strength and durability. Designed for enduro and off-road bikes, offering versatility and safety for off-road trails. Integrated handlebar attachment arms built into the bar. Steel expanding bolt ensures secure mounting and resists torsional movement upon impact.

Includes an extension to protect brake and clutch levers/pumps. Features a removable bi-injection cover. Easy to install on handlebars with an outer diameter of Ø22 to Ø28. Universal mounting kit included. Available in multiple colors to match the most popular off-road brands.

ACERBIS CHAIN GUIDE FOR TRIUMPH 298635

298635-12

FEATURES

The Acerbis chain guide provides impact resistance thanks to its high-strength plastic material. It is made of two pieces: the body and the slide. The slide is replaceable when worn. The 2-piece construction also means the chain does not have to be disassembled when mounting the guide or replacing the slide.

The controlled-elasticity construction of the guide absorbs shock and minimizes damage to the chain and sprocket; it also reduces oscillatory shaking of the chain. It is easily applied on the original housings on the swingarm. Mounting kit included.
