# X-GRIP FRAME PROTECTION FOR TRIUMPH

**298670**

298670-237

## FEATURES

The X-GRIP frame cover is conceived and designed to protect the frame in the area of contact with the rider's boots. The product has a dual function: to protect the frame from rubbing wear and to increase grip while riding. For this reason, a layer of rubber is applied to the outside of the frame cover to increase grip. Assembly and disassembly are facilitated by the use of expansions and elastic bands.

Protects the frame in the area of maximum friction
Use of rubber to increase grip and thus control of the bike
Easy assembly and disassembly using the original screw and plastic ties

The Acerbis chain guide provides impact resistance thanks to its high-strength plastic material.
Consists of two parts: a replaceable slide and the main body, allowing slide replacement without disassembling the chain.
Reduces chain oscillation.
The controlled elasticity structure of the chain guide absorbs shocks and minimizes damage to the chain and sprocket.
Crown and chain protection.
Easily installed with supplied mounting hardware.
Weight: 300g

# ACERBIS CHAIN GUIDE FOR TRIUMPH

**298635**

298635-12

## FEATURES

The Acerbis chain guide provides impact resistance thanks to its high-strength plastic material.
It is made of two pieces: the body and the slide. The slide is replaceable when worn.
The 2-piece construction also means the chain does not have to be disassembled when mounting the guide or replacing the slide.

The controlled-elasticity construction of the guide absorbs shock and minimizes damage to the chain and sprocket; it also reduces oscillatory shaking of the chain.
It is easily applied on the original housings on the swingarm.
Mounting kit included.
